Ed-Fi Cloud Deployment Options

Ed-Fi ODS/API in Cloud Deployments

Cloud ODS/API - Differentiation

1. Get Started with ODS / API (1-5 days)

- Ensure you have access to .Net developer resources (agency or Systems Integrator)
- Following "Getting Started" instructions and pulling source code
- Get solution up and running on a developer machine

2. ODS / API - Dev Ops (Days - Weeks)

- Build out development and deployment infrastructures
- Continuous integration: development -> staging -> production sites

3. ODS / API - Extensions & Customizations (Weeks - Months)

- Determine requirements for extensions - MappingEdu
- Develop, integrate extensions into solution - MetaEd
- Customize if needed - e.g. SEA-specific Identity integration, additional data validation - .Net, c#

4. Test, Deploy, Maintain, Upgrade (Ongoing)

- Simple security config tool >> **ODS Admin App - improved management capabilities**
- Lots of scripts, developer time >> **reduced script, manual work**

*ODS/API core artifacts -
deployed into
customers public cloud
tenancy in < 30 mins*

*No Extensions or
customizations*

Cloud Deployment Tools

- Cloud deployment scripts and templates are available for AWS and Azure on the [Ed-Fi Exchange](#). If you are not currently an Ed-Fi licensee, visit [here](#) to learn more or contact us at exchange@ed-fi.org.
