

Ed-Fi Versioning is Changing??!!

BEFORE!

Ed-Fi ODS/API version

3.5

AFTER!

Ed-Fi ODS/API for Suite

3

version

5.0.0

FAQ

Q: why change this now?

A: this coincides with the move of Ed-Fi to full Open Source – why? read on...

Q: why are you making this so confusing?

A: ~~Froy told us to~~ Believe it or not, most open source developers find the **current** Ed-Fi versioning confusing because it doesn't follow standard industry practices

Q: what's with the 2 new numbers "0.0"?

A: these are meaningful to developers, but most folks can ignore them

Q: what's a "Suite"

A: a group of products that work together – every application in Suite "3" is designed to work with other apps in Suite 3

Q: who do I blame for this?

A: Blame these people – they created the so-called "industry norm" that is causing us problems: <http://semver.org>
(More seriously, what this group has given us is actually very GOOD for us in the long run).

Q: where can I get full details on this insanity?

A: complete info and coping guide is [here](#)
