# Tackling Learning Loss with Data

Sean Casey & the Ed-Fi Community

# Hello!

**Caroline Kazmierski**  
**Director of Communications & Mktg**

- Two years @ Ed-Fi
- Tech PR expert
- Contact: [Caroline.Kazmierski@ed-fi.org](mailto:Caroline.Kazmierski@ed-fi.org)
- Twitter: [@edfialliance](https://twitter.com/edfialliance)

**Sean Casey**  
**Manager of Strategic Partnerships**

- Two years @ Ed-Fi
- Former CIO and Assistant Superintendent
- Contact: [Sean.Casey@ed-fi.org](mailto:Sean.Casey@ed-fi.org)

# Our mission:

To securely and seamlessly connect education data systems to support every learner.

# During this session:

We'll showcase **4 ways** + rapid deployment data tools created from successful **field implementations** to help you **tackle & prevent learning loss**

# Multidimensional Problems Need...

Multidimensional approaches

But targeted solutions

And multiple points of DATA

# Problem & Solution #1

**Are my learners getting or missing instructional time?**

Absences have near-term AND long-term consequences

Lost instructional time is a compounding problem

Meet the [Chronic Absenteeism Starter Kit](#)

Use real time data & field-tested approaches

Try a sample app & sample data

Make it your own & put an actionable tool in your leaders' hands

# Problem & Solution #2

**Are my remote/blended learners participating and engaging?**

My learners are using LMS's heavily,

Remote, in person, synchronous, asynchronous learners

And I need to understand their participation, attendance

And ultimately their engagement, success, & needs

Meet the LMS Toolkit (download/install [here](#))

Extract & analyze student activity & assignment data

# Problem & Solution #3

**Are my learners' families and caregivers involved and aware?**

The home to school connection is more important than ever

Parents & caregivers need to understand student participation, attendance, on/off track indicators, mastery

Meet the [Family Engagement starter kit](#)

# Problem & Solution #4

## Where are my learners are right now in their learning?

As a Teacher (and administrator) I need:

- real time assessment data
- from multiple measures, brought together
- To understand where my kids are struggling or mastering their learning

Use Ed-Fi to Harness Assessment Data (kit coming 5/28)

Use real time data & field-tested approaches (like [FL CODE](#) collaborative)

Answer essential questions like “Are my middle school students improving in math?”

Grow beyond single reports - draw insights **across** tools and assessments

# It May Not Be “Learning Loss”

It may be:

- Participation
  - Differentiation
  - Authentic assessment
  - Engagement
  - Mastery
  - Equity
- All of which need... you guessed it, DATA!
  - Data in real time, from multiple measures/sources
  - To drive insights, to drive action.

## Common Questions Before You Get Started

How much will this cost?

+

How much time will this take?

+

What district systems will be involved?

+

Who (and what roles) should be involved?

+

What district technology will I need?

+

# How Do I Get Started With Ed-Fi Solutions?

1. Get Started – create your account

<https://www.ed-fi.org/create-an-account/>

2. Lean on us, Ed-Fi & LEA team

[Sean.casey@ed-fi.org](mailto:Sean.casey@ed-fi.org)

3. Choose a kit. Make a vendor ask. (we can help).

Join us at Ed-Fi Exchange Live with a special discount code for \$10 off your purchase. Use Code: XLIVECoSN and visit our website to register now:
